SUMMARY

Final-year B.Tech CSE (AI & ML) student at VIT Bhopal (CGPA: 8.68/10) seeking SDE, AI Engineer, or Data Analyst roles. Hands-on expertise building production LLM agents, deep neural networks (PyTorch), scalable backend APIs (FastAPI), and SQL databases. Strong foundation in Data Structures & Algorithms (C++/Python) with a proven record of shipping real-world data pipelines and automated workflows.

EDUCATION

Vellore Institute of Technology Bhopal Sep 2023 – Present

B.Tech, Computer Science and Engineering (AI & ML) | CGPA: 8.68 / 10

TECHNICAL SKILLS

Languages: Python, C++, SQL

Core CS & SDE: Data Structures & Algorithms (DSA), OOPs, DBMS, REST APIs, FastAPI, Pydantic

AI / ML & GenAI: PyTorch, TensorFlow, Scikit-learn, LangChain, LangGraph, RAG, Transformers, spaCy

Data Analytics & Databases: PostgreSQL, MySQL, Relational Schema Design, Vector Databases, Pandas, NumPy

Developer Tools & Cloud: Google Cloud (GCP), Streamlit, Git, GitHub, Linux Shell

EXPERIENCE

Research Intern — INCOIS, Hyderabad May 2026 – Jun 2026

Ministry of Earth Sciences, Govt. of India

PROJECTS

AutoDataScientist — Multi-Agent ML & Analytics Lab Python, PyTorch, LangGraph, Streamlit

- Built an autonomous multi-agent engineering pipeline (Profiler, Strategist, Coder, Critic, Explainer) in LangGraph to profile datasets, eliminate target leakage, and train custom PyTorch networks in under 3 minutes.
- Engineered a self-healing Coder Agent in an isolated subprocess execution sandbox with AST traceback parsing, auto-diagnosing and recovering from runtime exceptions across 3 automated retry cycles.
- Designed a custom PyTorch Tabular ResNet with learnable entity embeddings and continuous skip connections; automated hyperparameter optimization and exported model weights with feature attribution reports.

AI Contract & Legal Document Analyzer Python, Sentence Transformers, spaCy, Streamlit

- Engineered an end-to-end NLP legal document processing pipeline parsing multi-format contracts (PDF, DOCX, TXT), segmenting clauses and classifying sections across 10+ categories with Sentence Transformers.
- Developed a multi-tier entity extraction pipeline combining spaCy Named Entity Recognition (NER) and regex matchers to isolate contracting parties, monetary figures, effective dates, and obligations.
- Deployed an interactive Streamlit analytics dashboard enabling real-time clause risk filtering, metadata extraction, and contract audits, reducing document review turnaround time by 75%.

CERTIFICATIONS

- Applied Machine Learning in Python — Coursera
- Google Cloud Generative AI — SmartInternz
- Google IT Support Certificate — Google / Credly
